Aims and Scope

Microbial Ecology is an international journal featuring articles of original research and mini-review articles on those areas of ecology involving microorganisms, including procaryotes, eucaryotes, and viruses. The Editors invite submissions in the areas of:

* significant advances in the microbiology of natural ecosystems
* ecological studies in medical, dental, animal, and plant microbiology
* molecular biology and genetics in microbial ecology
* ecological studies in applied microbiology
* current methodological developments
* microbial processes associated with environmental pollution

The exclusive copyright for all languages and countries, including the right for photomechanical and any other reproductions, also in microform, is transferred to the publisher.
The use of registered names, trademarks, etc. in this publication does not imply, even in the absence of a specific statement, that such names are exempt from the relevant protective laws and regulations and therefore free for general use.
